👤 PROFESSIONAL PROFILE

Motivated IT undergraduate specializing in Software Engineering with a solid foundation in programming, web development, databases, and software engineering principles. Passionate about developing software solutions and solving real-world problems. Seeking internship opportunities to gain industry experience and further enhance technical skills.

🎓 EDUCATION

BSc (Hons) in Information Technology specializing in Software Engineering, 2024 – 2028
Sri Lanka Institute of Information Technology (SLIIT)

G.C.E A/L, J/Vembadi Girls' High School 2020 – 2023

G.C.E O/L, J/Vembadi Girls' High School 2018 – 2019

🧠 SKILLS

Technical Skills

Java, Python, HTML, CSS, JavaScript, MySQL, MongoDB, React, Node.js, Express.js, REST API Development, Git, GitHub, Postman, VS Code, IntelliJ IDEA, Ubuntu/Linux (Basic)

Soft Skills

Time Management, Teamwork, Communication (Verbal & Written), Analytical Thinking, Problem Solving, Leadership

📁 PROJECTS

Web-Based Career Selection and Education Guidance System for Sri Lankan School Leavers Ongoing
After O/L and A/L Examinations, [2026 Ongoing]

Technologies: React (Vite), Node.js, Express.js, MongoDB

- Developed a full-stack web application to guide students in selecting career paths and university options
- Developed for a real client using the MERN stack
- Implemented an Alternative Pathway Recommendation
- Built RESTful APIs and integrated MongoDB for data management

Research - Prediction of Second-Hand Car Prices in Sri Lanka, (ThinkAI Expo 2025)

Technologies / Concepts: Artificial Intelligence

- Developed a machine learning-based model to predict second-hand car prices in Sri Lanka
- Applied data preprocessing and analysis techniques to improve prediction accuracy
- Presented research findings at ThinkAI Expo 2025

Movie Ticket Reservation Platform (Group Project)

Technologies: SpringBoot

- This project focused on developing an online movie ticket reservation system
- The platform allows users to select seats, book tickets, and manage reservations efficiently.
- I collaborated with a group to design and implement the system, gaining experience in teamwork and software development practices.

Web-Based Event Management System (Group Project)

Technologies: Spring Boot

- This project involved developing a web-based event management system using Java Spring Boot for the backend and web technologies for the frontend
- The system supports event creation, user registration, and schedule management, providing an efficient way to organize and manage events.
- I worked as part of a team, contributing to both backend development and overall system functionality.

COURSES

Additional Learning, *Spring Boot Development Training (Private Instructor)*

- Gained hands-on experience in developing CRUD applications using Spring Boot
- Developed and tested RESTful APIs using Postman
- Acquired knowledge in database integration using PostgreSQL
- Learned backend development concepts including MVC architecture and API design
- Applied these skills in academic group projects

CERTIFICATES

Basics of Python - Uniathena

Gained foundational knowledge in Python programming concepts.

AI Research Poster Exhibition - ThinkAI Expo 2025 - SLIIT NorthernUNI

Presented an AI research poster for Prediction of Second-Hand Car Prices in Sri Lanka
